Chem Lab - Paint & Misc Information Page

*** As of 01-01-02, both materials that Passed and Failed are shown in the misc database.

A new search feature has been added. Also made some other minor changes. ***

These Lot Numbers have been previously tested and may or may **NOT** be approved for use.

- [Browse Misc Lot Numbers Online](#) - updated as new samples are added
- [Download the latest Lot Number Database *](#) - updated as new samples are added
- [Lot Numbering Systems](#) - how they work
- [Sampling Tips](#) - keep up to date & avoid resamples

Lot Numbering Systems

This is a list of some manufacturer's materials, and how their lot numbering systems work.

Manufacturer	Material	Lot Numbering System	Example
Avery-Dennison	Retroreflective Sheeting	16 characters	4E14YP002509100A
		The first 10 characters are required	4E14YP0025
3M	Retroreflective Sheeting	3 letters + 1 number	BIR-3
		or 5 numbers	or 3223-4
	Cold Plastic and Patterned Cold Plastic	3 letters + 1 number	BIR-3
		or 5 numbers	or 3223-4
	Durable Pavement Marking	3 letters + 1 number	BIR-3
		or 5 numbers	or 3223-4
Briteline	Cold Plastic	5 digits + 1 letter	09298A
	Thermoplastic	5 digits + 1 letter	09298A
Potters	Glass Beads	1, 2, 3 or 4 digits	5, 36, or 12-04
IPS	Epoxy Pavement Marking	A letter +3 numbers + a letter(indicating color) + 3 numbers	T408W171 or T088Y120
Swarco	Glass Beads	6 numbers	066104
	Thermoplastic	EY or EW + 7 characters	EY0442297

Sampling Tips

General Tips

- Sample materials as soon as you can. Often we get samples marked "RUSH". In reality there is very little we can do to rush a sample through the testing process. Most tests require a duration of time, and there is simply no way to speed up time. So, please send samples in as soon as possible.

Sampling Reflective Sheeting

- Sample size should be approximately of 9" X 18".
- Ship sheeting flat sandwiched between two pieces of cardboard. Please do not send rolled samples. Rolled samples are very difficult to re-flatten for testing.
- With a felt tip marker, write the Brand and Lot number on the back upper corner.
- Please allow sufficient time for the marker ink to dry before stacking on top another sample.

[Picture of Sheeting Sample](#)

Sampling Cold Plastic & High Durability Pavement Marking Tape

- Cold Plastic Sample Size should be a minimum of 4" X 12".
- High Durability Sample Size should be a minimum of 4" X 36".
- Samples without a liner should be rolled on themselves with the adhesive to the inside. Secure the roll with masking tape. Samples with a liner should be sent in flat or rolled, leaving the liner on the sample.
- With a felt tip marker, write the Brand and Lot number on the masking tape or liner.
- Use care as to not soil the sample on either side. Samples with smudges can lead to bad test results.
